3. I talked to Matt Baird about [REDACTED], and we agreed that he should not enter the JOT Program. I requested that Matt arrange for the normal personnel interview in order that we could decide whether or not he should be entered on duty outside of the JOT Program. In talking to his father, however, I understand that he is seriously considering going into the Navy and getting his military duty behind him in which case he would not be available for or interested in CIA employment for at least two or three years.
